

who needs 40 watts r.m.s.?

Obviously, from the demand for the Wharfedale "Rosedale", many music lovers have this substantial acoustic power requirement. Few speaker systems can handle 40 watts R.M.S. — and *only a handful do it well*. For sheer power handling capacity — free of colouration — the Wharfedale "Rosedale" leads this select group of high quality speaker systems.

With its 15" bass reproducer completely isolated from the 5" mid-range speaker and the 1" high pressure tweeter, the "Rosedale" has an effective frequency range of 35 — 20,000 Hz. Naturally it's a glorious piece of furniture which will grace any tasteful domestic environment. Measuring 24" x 23" x 13½", finishes available include oiled teak and polished walnut. The Wharfedale "Rosedale" will complement the highest quality amplifiers and signal sources.

But you live in a *flat!* Don't worry — you've not been neglected by Wharfedale. The "Denton", a bookshelf compact, has been

designed specifically for you. It measures only 15" x 9¾" x 9" but has a conservatively quoted frequency response of 65 — 17,000 Hz. This covers every musical instrument, every overtone.

With a specially designed "Deltaflex" surround for the 8" bass/mid-range speaker, the major problem of small enclosures . . . *cone break-up* . . . has been solved by Wharfedale sound engineers. The speaker only reproduces the signal fed to it — and the result is clean bass registers and accurate "*presence*" in the mid-range.

A separate 1" tweeter handles all notes and sounds over 1750 Hz. Power rating of the "Denton" is 15 watts R.M.S. These two fine British speaker systems are representative of the Wharfedale range; you can hear them all at your franchised Simon Gray dealer. When you do, listen for the *musical transparency* that identifies Wharfedale — for this intangible quality is the *reason* for Wharfedale's international success.

Easy sound to live with.
