

Hexadoku

Puzzle with an electronic touch

Hexadoku is drawing not just hundreds of correct answers every month but also encouraging feedback and other kind words from you all. Needless to say we're very pleased to see that Hexadoku has become an established part of the magazine.

The instructions for this puzzle are straightforward. In the diagram composed of 16 x 16 boxes, enter numbers such that **all** hexadecimal numbers 0 through F (that's 0-9 and A-F) occur once only in each row, once in each column and in each of the 4x4 boxes (marked by the thicker black lines). A number of clues are given in the puzzle and these

determine the start situation. All correct entries received for each month's puzzle go into a draw for a main prize and three lesser prizes. All you need to do is send us the numbers in the grey boxes.

The puzzle is also available as a **free download** from our website (Magazine → 2007 → March).

Prize winners
