Panasonic

WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public.

It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product.

Products powered by electricity should be serviced or repaired only by experienced professional technicians.

Any attempt to service or repair the product or products dealt within this service information by anyone else could result in serious injury or death.

SAFETY PRECAUTIONS

1 CAUTION:

No modification of any circuit should be attempted. Service work should only be performed after you are thoroughly familiar with all of the following safety checks and servicing guide lines.

2 SAFETY CHECK

Care should be taken while servicing this CRT display because of the high voltage used in the deflection circuits. These voltages are exposed in such areas as the associated flyback and yoke circuits.

3 FIRE & SHOCK HAZARD

3-1 Insert an isolation transformer between the CRT display and AC power line before servicing the chassis.

3-2 In servicing pay attention to original lead dress especially in the high voltage circuit. If a short circuit is found, replace all parts which have been overheated as a result of the short circuit.

3-3 All the protective devices must be reinstalled per original design.

3-4 Soldering must be inspected for possible cold solder joints, frayed leads, damaged insulation, solder splashes or sharp solder points. Be certain to remove all foreign material.

4 LEAKAGE CURRENT COLD CHECK

4-1 Unplug the AC cord and connect a jumper between the two prongs on the plug.

4-2 Turn the CRT display power switch "on".

4-3 Measure the resistance value with an ohmmeter between the jumpered AC plug and each exposed metallic part on the CRT display such as the metal frame, screwheads, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be 1.8 megohm minimum.

5 LEAKAGE CURRENT HOT CHECK

5-1 Plug the AC cord directly into the AC outlet. Do not use an isolation transformer during this check.

5-2 Connect a 1500 ohm, 10 watt resistor, paralleled by a $0.15\mu F$ capacitor between each exposed metallic part and a good earth ground (as shown in Fig.1).

5-3 Use an AC voltmeter with 1000 ohm/volt or more sensitivity and measure the AC voltage across the combination 1500 ohm resistor and $0.15\mu F$ capacitor.

5-4 Move the resistor connection to each exposed metallic part and measure the voltage.

5-5 Reverse the polarity of the AC plug in the AC outlet and repeat the above measurement.

5-6 Voltage measured must not exceed 7.5 volt RMS, from any exposed metallic part to ground. A leakage current tester may be used in the above hot check, in which case any current measured must not exceed 5.0 milliamp. In the case of a measurement exceeding the 5.0 milliamp value, a rework is required to eliminate the chance of a shock hazard.

Note: High voltage is present when this CRT display is operating. Always discharge the anode of the picture tube to the display chassis to prevent shock hazard.

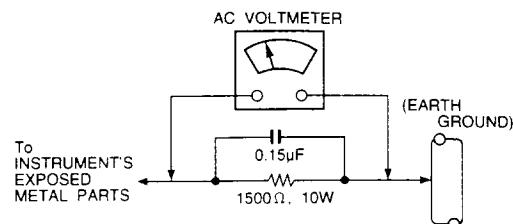

Fig.1

6 IMPLOSION PROTECTION

Picture tubes are equipped with an integral implosion protection system, but care should be taken to avoid damage and scratching during installation. Use only Panasonic replacement picture tubes.

7 X-RADIATION

WARNING : The only potential source of X-Radiation is the picture tube. However when the high voltage circuitry is operating properly there is no possibility of X-Radiation problem. The basic precaution which must be exercised is to keep the high voltage at the following factory-recommended level.

Note: It is important to use an accurate periodically calibrated high voltage meter.

7-1 The procedure for adjustment high voltage is as shown on page 25.

7-2 If can not be adjust 25.0 kV at immediate service is required to prevent the possibility of premature component failure.

7-3 To prevent X-Radiation possibility it is essential to use the specified picture tube.

IMPORTANT SAFETY NOTICE

There are special components used in this CRT displays which are important for safety. These parts are identified by the international symbol Δ on the schematic diagram and on the replacement parts list. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent X-RADIATION, shock, fire or other hazards. Do not modify the original design or this will void the original parts and labor guarantee.

GENERAL INFORMATION

1. OUTLINE

TX-D1734F is 17 inch multi-scan color CRT display with the following nice features.
OSD (on screen display) Control is newly introduced, which allows easy user adjustment.

2. FEATURES

2-1 Stereo Dome Speakers

- High quality stereo sound by Panasonic Dome Speaker system
- Audio typical output 3W+3W
- THD (Total Harmonic Distortion) maximum 1.0% (output=1.0W)

2-2 Mic function

A microphone is installed on the front panel of monitor for sending voice message to computer system. Also microphone jack is mounted on left side of monitor for additional use.

2-3 Headphone function

Headphone jack is also mounted on left side of monitor to enjoy music, conversation and entertainment

2-4 Power Saving

Built in Power Saving function based on VESA-DPMS standard.

Power energy shall be saved by controlling the circuit in accordance with power save signal from computer.

2-5 OSD (on screen display) function

OSD (5 languages) is new and excellent man-machine interface.

Anyone is able to set up the picture as he like through OSD menu.

2-6 Self Test function

Self testing picture comes out by pushing any key in the case of no-connection with computer or power saving operation.

This function shows if monitor is alive or not and can be used for self aging test.

2-7 Ergonomic design

- Low emission design to meet MPR II & TCO'92
- ESF (Electro static field) free coating on CRT

2-8 Multi scan with digital technology

• 8 bit micro computer controls the circuit operation to meet with wide range signal of $f_H = 30 \sim 69$ kHz and $f_V = 50 \sim 160$ Hz. So VGA640x350, VGA640x400, VGA640x480, SVGA800x600, 1024x768 and 1280x1024 mode are applicable.

2-9 1 Factory preset, (+7 Reservation), 13 user memories.

- 1 standard mode is preset at the factory.
- 7 modes are reserved at the factory.
- 13 user memories are available to set the users own timing and display information.

2-10 Flat Face and fine dot pitch

- Flat face CRT with a fine dot pitch of 0.27 mm gives a comfortable sight of the screen.

2-11 Superior display performance

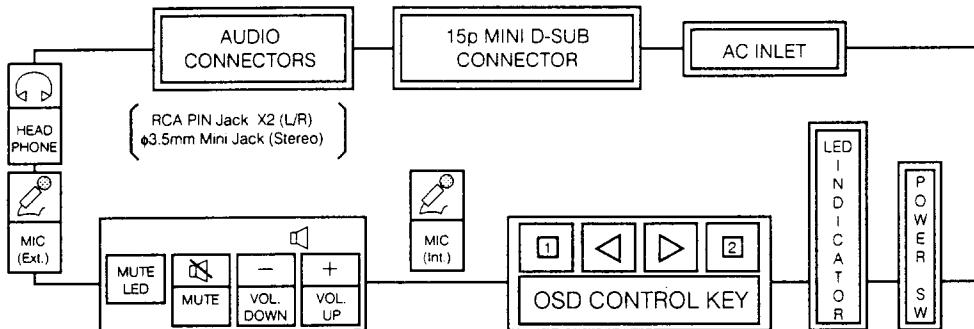

- Good focus by sophisticated gun and dynamic focus circuit
- High contrast
- Minimized distortion by correction circuit
- Good convergence
- Users enjoy full scan image for graphick

2-12 Special function

- VESA DDC1/2B (Display Data Channel) compatible
- Rotation control circuit

SPECIFICATION

1. DIAGRAM

1.1 POWER SW, LED, [1]-key (MENU), <-key (DOWN), >-key (UP), and [2]-key (ENTER) are located on the front panel.

1.2 Signal cable and AC inlet are located on the back side of the cabinet.

1.3 OSD menu includes the following function.

CONTRAST	BRIGHTNESS	DEGAUSS
RECALL	H.POSITION	H.SIZE
V.POSITION	V.SIZE	V.PINCUSHION
TRAPEZOID	PARALLELOGRAM	ROTATION

COLOR SELECT

VIDEO INPUT LEVEL

DISPLAY FREQUENCY

LANGUAGES

※) CONTRAST can be directly controlled with </>-key.

※) With sync signal, OSD menu appears by pushing [1]-key.
Without sync signal, self test menu appears by pushing [1]-key.

※) Audio Level can be directly controlled with VOL UP/DOWN-key.

2. MECHANICAL SPECIFICATIONS

..... refer to the attached drawing

2.1 Dimension Height : 418 mm (16.5") (typ.)
 Width : 438 mm (17.2") (typ.)
 Depth : 438 mm (17.2") (typ.)

2.2 Net Weight : 19.2 kg (typ.)

2.3 Maximum Viewable Phosphor Display Area : 406.4 mm (16.0") (typ.)

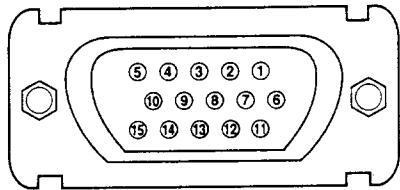

3. CONNECTORS

3.1 Signal connector:

15P Mini D-Sub cable ... un-detachable

3.2 AC inlet: CEE 22 typed connector

<15P Mini D-Sub Pin assignment>

2 ... GREEN	7 ... GROUND	12 ... SDA (DDC)
3 ... BLUE	8 ... GROUND	13 ... H. SYNC.
4 ... GROUND	9 ... - (OPEN)	14 ... V. SYNC.
5 ... GROUND (DDC)	10 ... GROUND	15 ... SCL (DDC)

4. CRT SPECIFICATIONS

Part No.	M41KXH140X
Type	17", 90°, 29Ø, in-line gun (16.0" Viewable)
Dot Pitch	0.27 mm
Phosphor	R, G, B Short Persistence (Hi-Eu RED)
CIE Color point	Red x: 0.635 (± 0.020) y: 0.333 (± 0.020) Green x: 0.280 (± 0.020) y: 0.595 (± 0.020) Blue x: 0.152 (± 0.015) y: 0.063 (± 0.015)
Bulb	DARK TINT
Face	NEW AGRAS COAT
Total Transmission	42.5 %

5. ELECTRICAL SPECIFICATIONS

5.1 Standard conditions ... Except special items

Display image	Green, full "H" characters with a border line. (7 x 9 dots) Video signal : 100% duty Display area : 300 mm x 225 mm
Video signal level	0.7 V pp
Contrast, Brightness	Contrast : Max., Brightness : detent point
Ambient Temperature	20±5°C (68 ± 9°F)
Input Voltage	AC 120 V, 60 Hz or AC 220 V, 50 Hz
Terrestrial magnetism	Vertical field : northern hemisphere field 40 µT (southen hemisphere field -40 µT) Horizontal field : no field
Viewing direction	Parallel to the CRT axis
Measurements	After an initial warming up time of more than 30 minutes.
Ambient light	200±50 Ix
Display mode	1024 x 768 (60.02 kHz, 75.03 Hz)

5.2 POWER

5.2.1 Power supply ... Commercial power source

Input voltage	AC 90 - 132 V, AC 198 - 264 V
Power frequency	50 Hz ± 3 Hz, 60 Hz ± 3 Hz
Input current	2.4 A Max. (100 V)
Inrush current (at 20° C)	40 A op
Power consumption	130 W (Typ.)

5.2.2 Power Management for Power Saving ...

Power saving system is designed based upon VESA DPMS standard (Version : 1.0)

1) Power consumption and recovery time.

*1 APM State	SIGNALS			MONITOR POWER CONSUMP- TION	RECOVERY TIME TO ON STATE	INDICATOR
	H. Sync	V. Sync	VIDEO			
ON	*3 NOR- MAL	*3 NOR- MAL	*2 ACTIVE	*4 100%	—	Green
*6 STAND- BY	No Sync or *5 < 6 kHz	> 40 Hz	BLANK	< 20 W	< 4s	Yellow
SUS- PEND	> 10 kHz	No Sync or *5 < 20 Hz	BLANK	< 20 W	< 4s	Yellow
OFF	No Sync or *5 < 6 kHz	No Sync or *5 < 20 Hz	BLANK	< 8 W	< 20s	Yellow

** The transition time from ON state to each APM state is 5 seconds minimum.

*1 : APM : Advanced Power Management.

*2: Means. Condition of power consumption for ON state.

DISPLAY IMAGE : WHITE full "H" characters with a border line (7 X 9 dots).

*3 : NORMAL : See "5.4 ACCEPTABLE TIMING".

*4 : Power Consumption is measured at AC 100-240V.

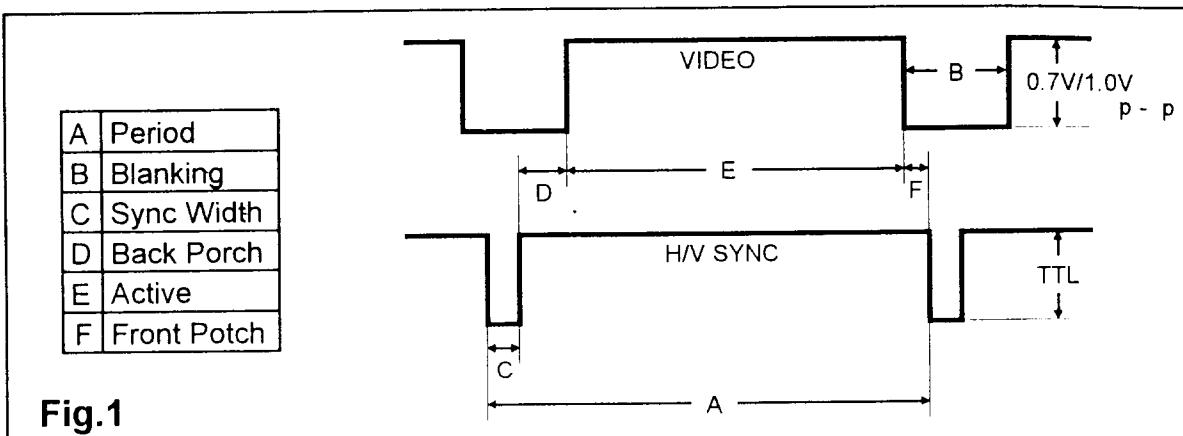

*5 : Power saving operation is done at least less than specified value in the list.

*6 : Micro controller will supply SUSPEND signal at this mode.

5.3 Standard timing (Standard mode)

- Following 1 mode is preset in the memory as standard timing at the factory and 7 modes are reserved.
- Fig-1 shows a definition of timing and signal level.
- Electrical performance is specified This SPECIFICATION is specified at STD (1024 x 768) mode unless otherwise mentioned.

TIMING CHART

DOT CLOCK	PRESET		RESERVATION	
	MODE - 1		MODE - 2	
	1024 × 768 (75)	640 × 480 (60)	640 × 480 (75)	31.5000 MHz

SYNC POLARITY(H/V)		Negative / Negative

5.4 Acceptable timing

- If your timing is within following specification, this CRT display can automatically function with a certain size and position.

Horizontal: Sync frequency: 30.0 ~ 69.0 kHz

Blanking Time: $\geq 3.4 \mu s$

Back Porch: $\geq 1.25 \mu s$

Front Porch: \leq Back Porch

Sync Width: $\geq 1.2 \mu s$

Vertical: Sync frequency: 50.0 ~ 160.0 Hz

Blanking Time: ≥ 0.5 ms

Back Porch: ≥ 0.4 ms

Sync Width: ≥ 0.045 ms

- Several items like size, position and distortion can be adjusted through OSD menu, and if you want to keep it, please push the key [1] for memory, or keep the key untouched for about 20 seconds, it is automatically memorized.

NOTE : In case of RECALL, the key is untouched for about 30 seconds, RECALL function will be cancelled.

Please note, however, that there is the case you can not get the size and/or position you want, (for example, in case Display video Time is too short, you can't get bigger size of the image.)

- The CRT adopted in this CRT display is designed to minimize the moire phenomenon at suitable size for typical display modes. However, there might be a display format among many formats, in which the moire phenomenon appears on this display.

5.5 Signal level and input impedance

5.5.1 Video Signal level

- This CRT display is adjusted at the factory using 0.7Vpp Video Signal. Black level is 0 V.

5.5.2 Sync Signal level

- H/V Separate, H/V Mixed: TTL level
- Sync on Green : 0.3 V p-p ± 0.015 V

5.5.3 Audio Signal Level

Maximum audio input level is 2.0Vrms (f: 1kHz, sinewave)

Note: This CRT display is designed that the Sound microphony on image is not visible less than 0.5Vrms audio input level. If the Sound microphony appears, please reduce audio output level by Audio Volume Key.

5.5.4 Input impedance

- Video input: 75Ω
- Sync input: $\geq 1 k\Omega$

5.6 Display performance

5.6.1 Display area

1) PRESET TIMING

MODE 1

WIDTH : 300 mm ± 5 mm

HEIGHT : 225 mm ± 5 mm

2) RESERVATION TIMING

MODE 2~7

MODE 8

WIDTH : 300 mm ± 7 mm

286 mm ± 7 mm

HEIGHT : 225 mm ± 7 mm

229 mm ± 7 mm

5.6.2 Centering

1) PRESET TIMING (MODE1)

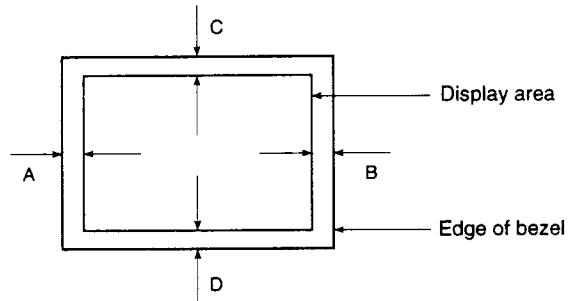

IA - BI ≤ 4 mm

IC - DI ≤ 4 mm

2) RESERVATION TIMING (MODE2~8)

IA - BI ≤ 7 mm

IC - DI ≤ 7 mm

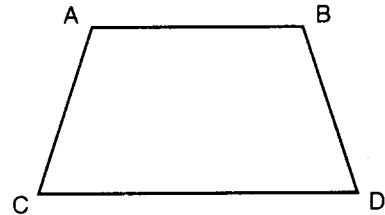

5.6.3 Distortion

1) Trapezoid

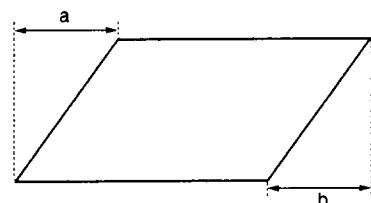

IAC - BDI ≤ 3 mm

IAB - CDI ≤ 2 mm

2) Parallelogram

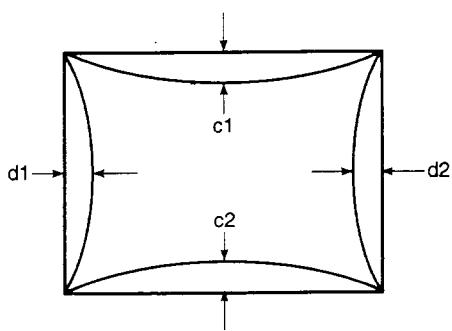

a, b ≤ 2 mm

3) Pincushion and Barrel

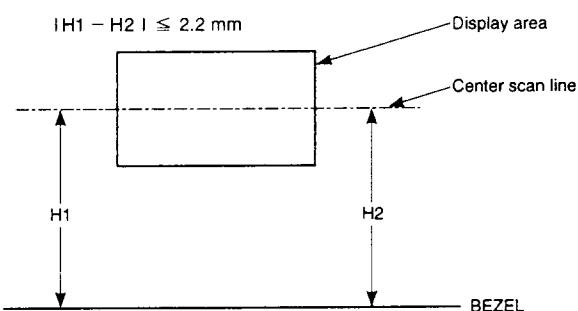

$|IC1|, |IC2| \leq 2.0 \text{ mm}$

$|Id1|, |Id2| \leq 2.0 \text{ mm}$

5.6.4 Rotation

$|H1 - H2| \leq 2.0 \text{ mm}$

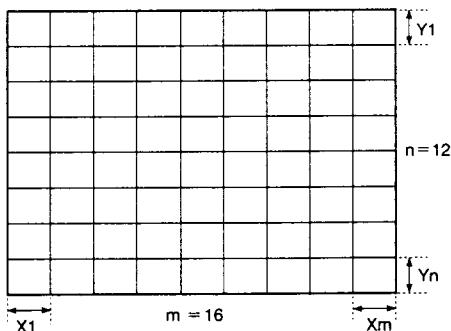

5.6.5 Linearity

Horizontal linearity

$$= \frac{X_{\max.} - X_{\min.}}{X_{\max.} + X_{\min.}} \times 100 \% \leq 7 \%$$

Vertical linearity

$$= \frac{Y_{\max.} - Y_{\min.}}{Y_{\max.} + Y_{\min.}} \times 100 \% \leq 6 \%$$

<Conditions>

Display image ----- crosshatch pattern

Maximum and minimum values should not be adjacent to each other.

X max. is maximum value among $X_1 \sim X_m$
X min. is minimum value among $X_1 \sim X_m$

Y max. is maximum value among $Y_1 \sim Y_n$
Y min. is minimum value among $Y_1 \sim Y_n$

5.7 General performance

5.7.1 Video output

Bandwidth	86 MHz (Typ.)
-----------	---------------

5.7.2 Maximum luminance

Value	130 cd/m² (Typ.) for 5% white field at the center of the display area. 103 cd/m² (Typ.) for 100% white field at the center of the display area. Specified by 9300 K + 8 MPCD
Conditions	Display image : White full flat field Luminance : Max. (Contrast : Max.) (Brightness : Detent point)

5.7.3 Minimum luminance

Value	$\leq 26 \text{ cd/m}^2$ at the center of the display area. Specified by 9300 K + 8 MPCD
Conditions	Display image : White full flat field Luminance : Min. (Contrast : Min.) (Brightness : Detent point)

5.7.4 Brightness variation

Value	70 % (Min.) Variation = C/A X 100
Conditions	Display image : White full flat field Luminance : MAX (Contrast : MAX) (Brightness : Detent point) A ; Luminance at center position C ; Luminance at position of lowest brightness

5.7.5 Display area regulation

	Display area variation	Range of variation
Due to Luminance	within 1.0 %	26~103 cd/m ² (white flat field)
Due to Power Supply	within 0.5 %	AC : 90 - 132 V or 198 - 264 V
Due to Temperature	within 1.0 %	20° C ± 20° C

5.7.6 Color Point

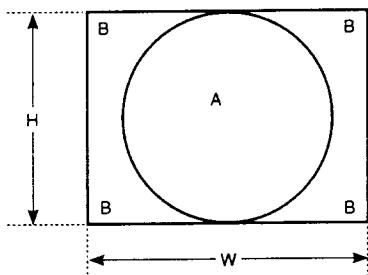

< Conditions >

Display image : White flat field at the center of the display area.
 Luminance : Brightness Detent point.

Contrast	max	min
Value	9300 K + 8 MPCD x = 0.283 ± 0.020 y = 0.298 ± 0.020	9300 K + 8 MPCD x = 0.283 ± 0.020 y = 0.298 ± 0.020

5.7.7 Misconvergence

Center area of display (A) : 0.3 mm (Max.)
 Corner area of display (B) : 0.4 mm (Max.)

<Conditions>

Display image : Crosshatch pattern mixed with R, G and B colors.
 Convergence gauge : KLEIN CM7AG or equivalent.
 Display area : W x H 300 x 225 mm

5.7.8 Purity

Conspicuous mislanding shall not be visible within display area at a distance of 60cm from CRT surface.

<Conditions>

Display image : White flat field
 Luminance : Contrast max, Brightness
 Display area : 300 x 225 mm

5.7.9 White Uniformity

$$xa - xc \leq \pm 0.015$$

$$ya - yc \leq \pm 0.015$$

xa : x coordinate at the CRT center

xc : x coordinate at any other point

ya : y coordinate at the CRT center

ya : y coordinate at any other point

<Conditions>

Display image : White flat field
 Luminance : 103 cd/m² at the center of display area
 Display area : 300 x 225 mm

5.7.10 Jitter

Invisible at a distance of 60 cm from CRT surface.

5.7.11 Audio

Electric Characteristics

	Item	Condition	Specification		
			Min.	Typ.	Max.
Line Input	Line Input signal level	f: 1kHz			2.0Vrms
	Line Input Impedance	.		24kΩ	
Audio-SP	Maximum Power Output (Electric)	f: 1kHz, THD: 1%	1W + 1W	3W + 3W	
	Signal to Noise Ratio	f: 1kHz		45dB	
	Channel Separation	f: 1kHz		40dB	
	Distortion	f: 1kHz, Output: 1W			1%
	Response Characteristics	THD: 1% Output: 1W 0dB at 1kHz	100Hz 100Hz	6dB 6dB	
Headphone	Maximum Electric Power Output	f: 1kHz, THD: 1%, Rc: 32Ω	5mW	7mW	
	Distortion	f: 1kHz, Output: 1mW Rc: 32Ω			1%
Mic	Microphone Sensitivity	f: 1kHz, Pin=1Pa (0dB=1V/Pa)		-43dB	

6. ENVIRONMENTS

6.1 Ambient temperature, humidity and altitude

	Operating	Storage and shipment
Temperature	0 ~ 40° C (32 ~ 104° F)	-20 ~ +60° C (-4 ~ 140° F)
Humidity	5 ~ 90 % *	5 ~ 90 % *
Altitude	3,000 m (Max.) (10,000 ft)	12,000 m (Max.) (40,000 ft)

* Non-condensation

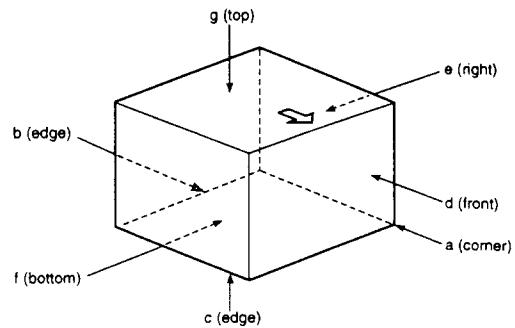

6.2 Vibration and shock

6.2.1 Vibration

	Order of tests	Direction of vibration	Acceleration		Frequency	Sweep	Test time
			Non-operation	Storage and shipment			
Unpacked	1	Vertical	Up to down	2.9 m/s ² (0.3 G)	5 - 55 Hz	120 s	30 min.
	2	Horizontal	Front to back				15 min.
	3		Right to left				
Packed	1	Vertical	Up to down	10m/s ² (1.0 G)	5 - 50 Hz	810 s Logsweep	40 min.
	2	Horizontal	Front to back				20 min.
	3		Right to left				

6.2.2 Shock (Drop test)

Unpacked	20 G One time for each face (6 faces) (non-operation)			
Packed	Order of drop	Face to drop is to face the floor. (See the figure)	Height	Number of drop
	1	a, b, c, d, e, g	60 cm	1 time for each
	2	f	70 cm	

7. REGULATORY STANDARDS

7.1 Safety standards

Applicable standards

- UL 1950; Listing
- CSA 22.2 No. 950; Certification
- TÜV EN60950 (IEC950)/GS (ZH1)
- NORDIC (SEMKO, NEMKO, DEMKO, FIMKO)

7.2 X-Ray standards

Applicable standards

- DHHS, 21CFR subchapter J
- PTB; Approval
- HWC

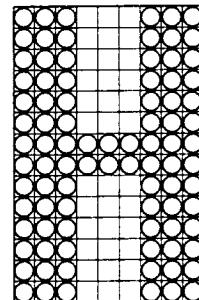

7.3 EMC standards

Applicable standards

- VCCI class 2
- FCC part 15, Subpart B, class B
- DOC class B
- CISPR22 class B (EN55022)

<EMI test pattern>

White, full "H" characters (9 x 14 dots), block (12 x 24 dots) "H" character font is as follows:

7.4 OTHERS

Applicable standards

- Energy Star
- MPR II
- TCO '92
- ISO 9241-3 (Ergonomics)

8. POWER CORD

UL and CSA approved AC power cord is put in packaged. Length : 2.0 meter (6.56 feet) if you use in other country (for example Germany), please use a power cord approved by safety agency of each country (VDE in Germany).

9. SIGNAL CABLE

Signal cable with Mini D-Sub 15P connectors at both end is put in package.

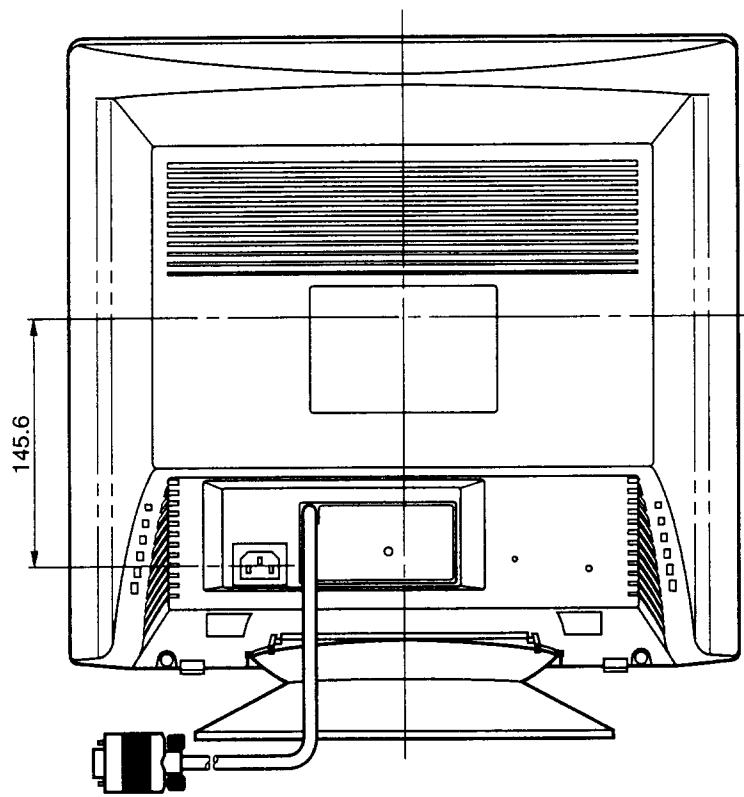

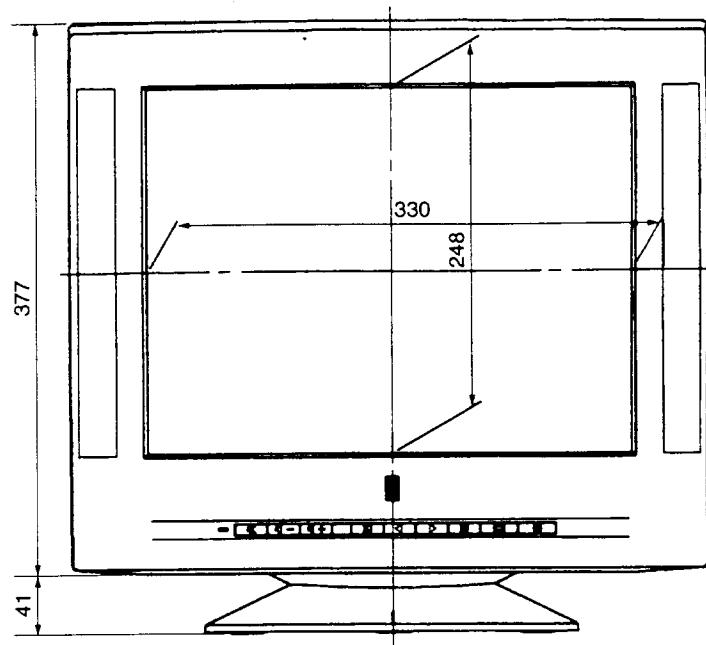

Length : 1.3 meter

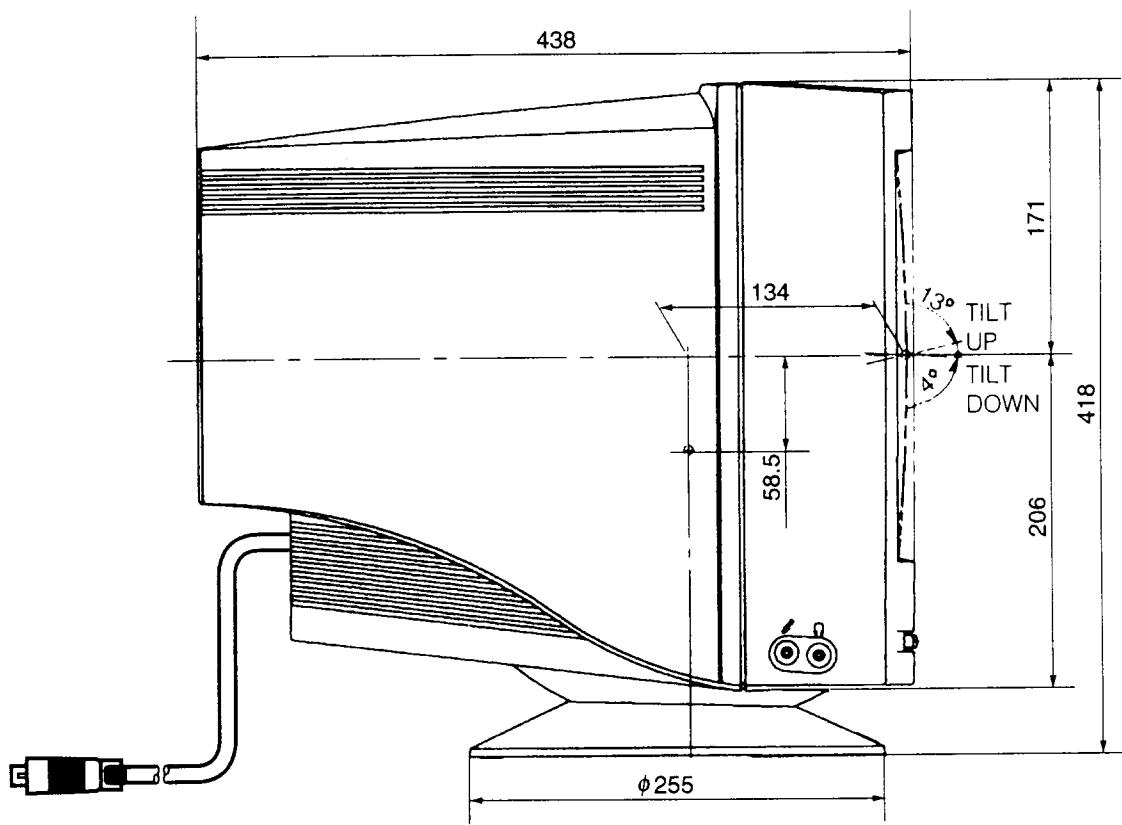

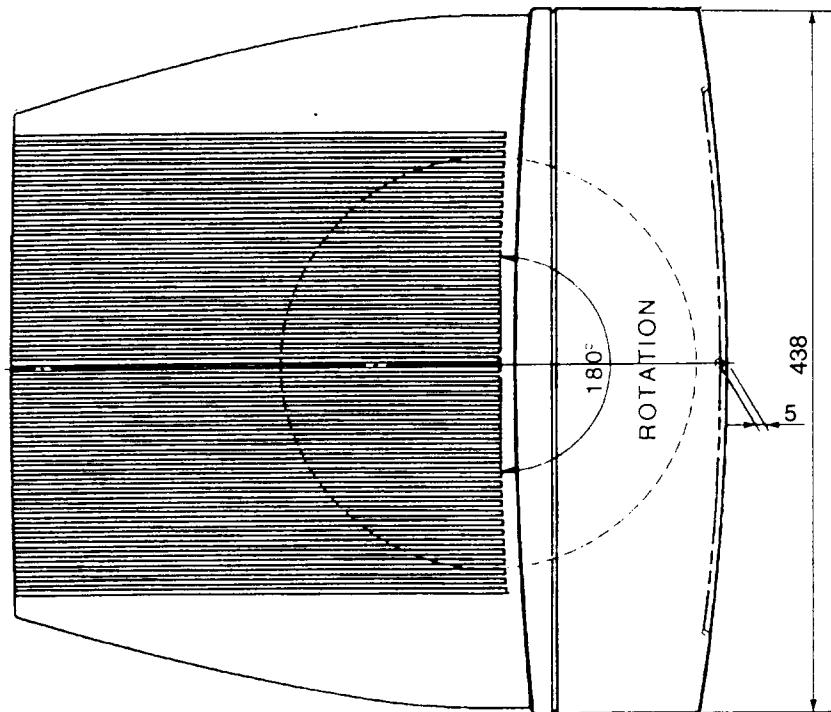

10. RELIABILITY

>55.000hrs (demonstrated MTBF)

DIMENSIONS

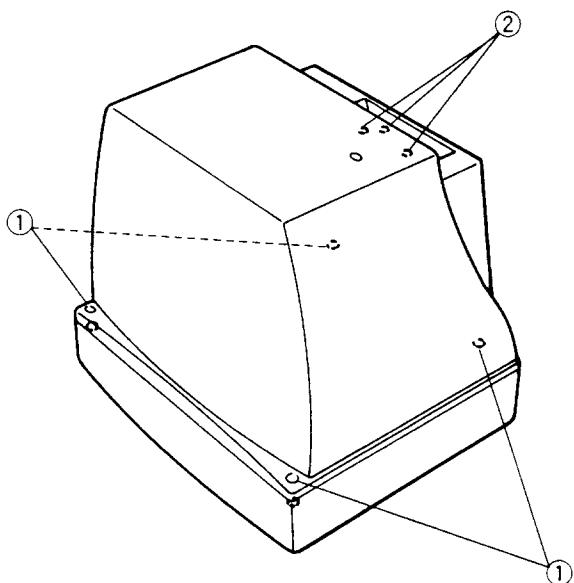

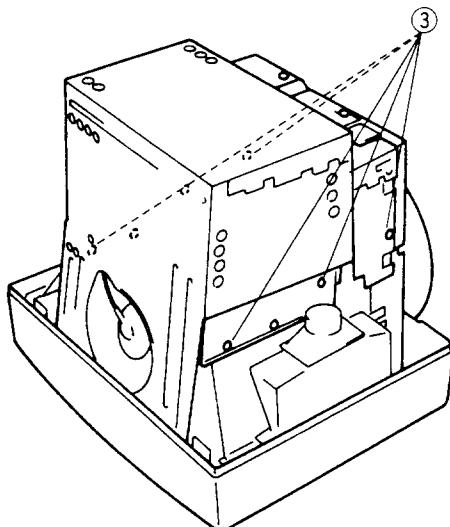

DISASSEMBLY INSTRUCTIONS

1. Rear cover removal

Note: Spread a mat underneath to avoid damaging the CRT surface.

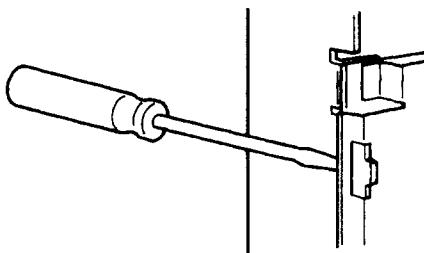

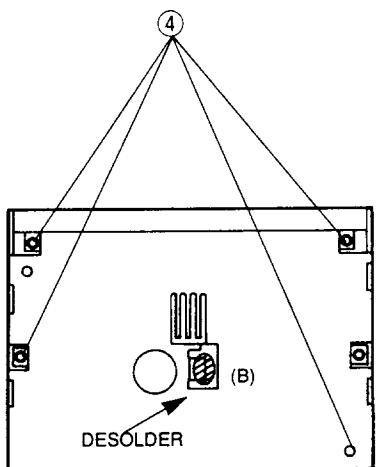

- 1) Remove four large screws ① and small screw ② from the rear cover.
- 2) Remove the cover.
- 3) Remove ten screws ③ from the shield case.
- 4) Remove the shield case.

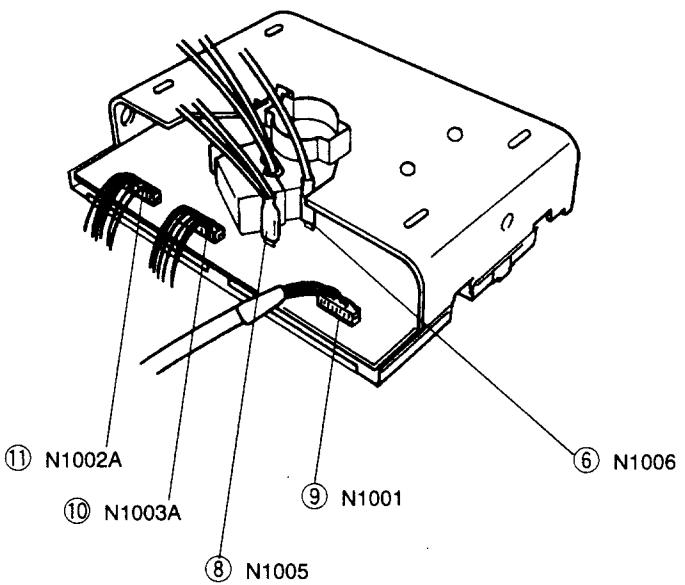

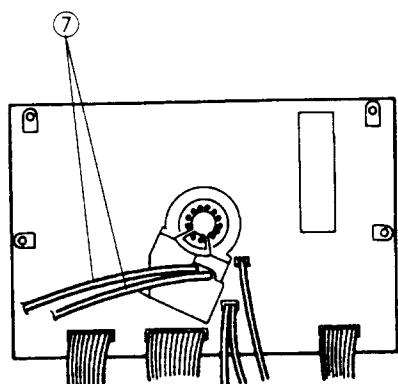

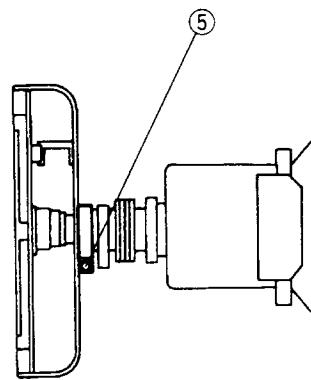

2. Video PCB removal

- 1) Remove four screws ④ securing the shield cover.
- 2) Desolder (B) and Remove the shield cover (A).

(A)

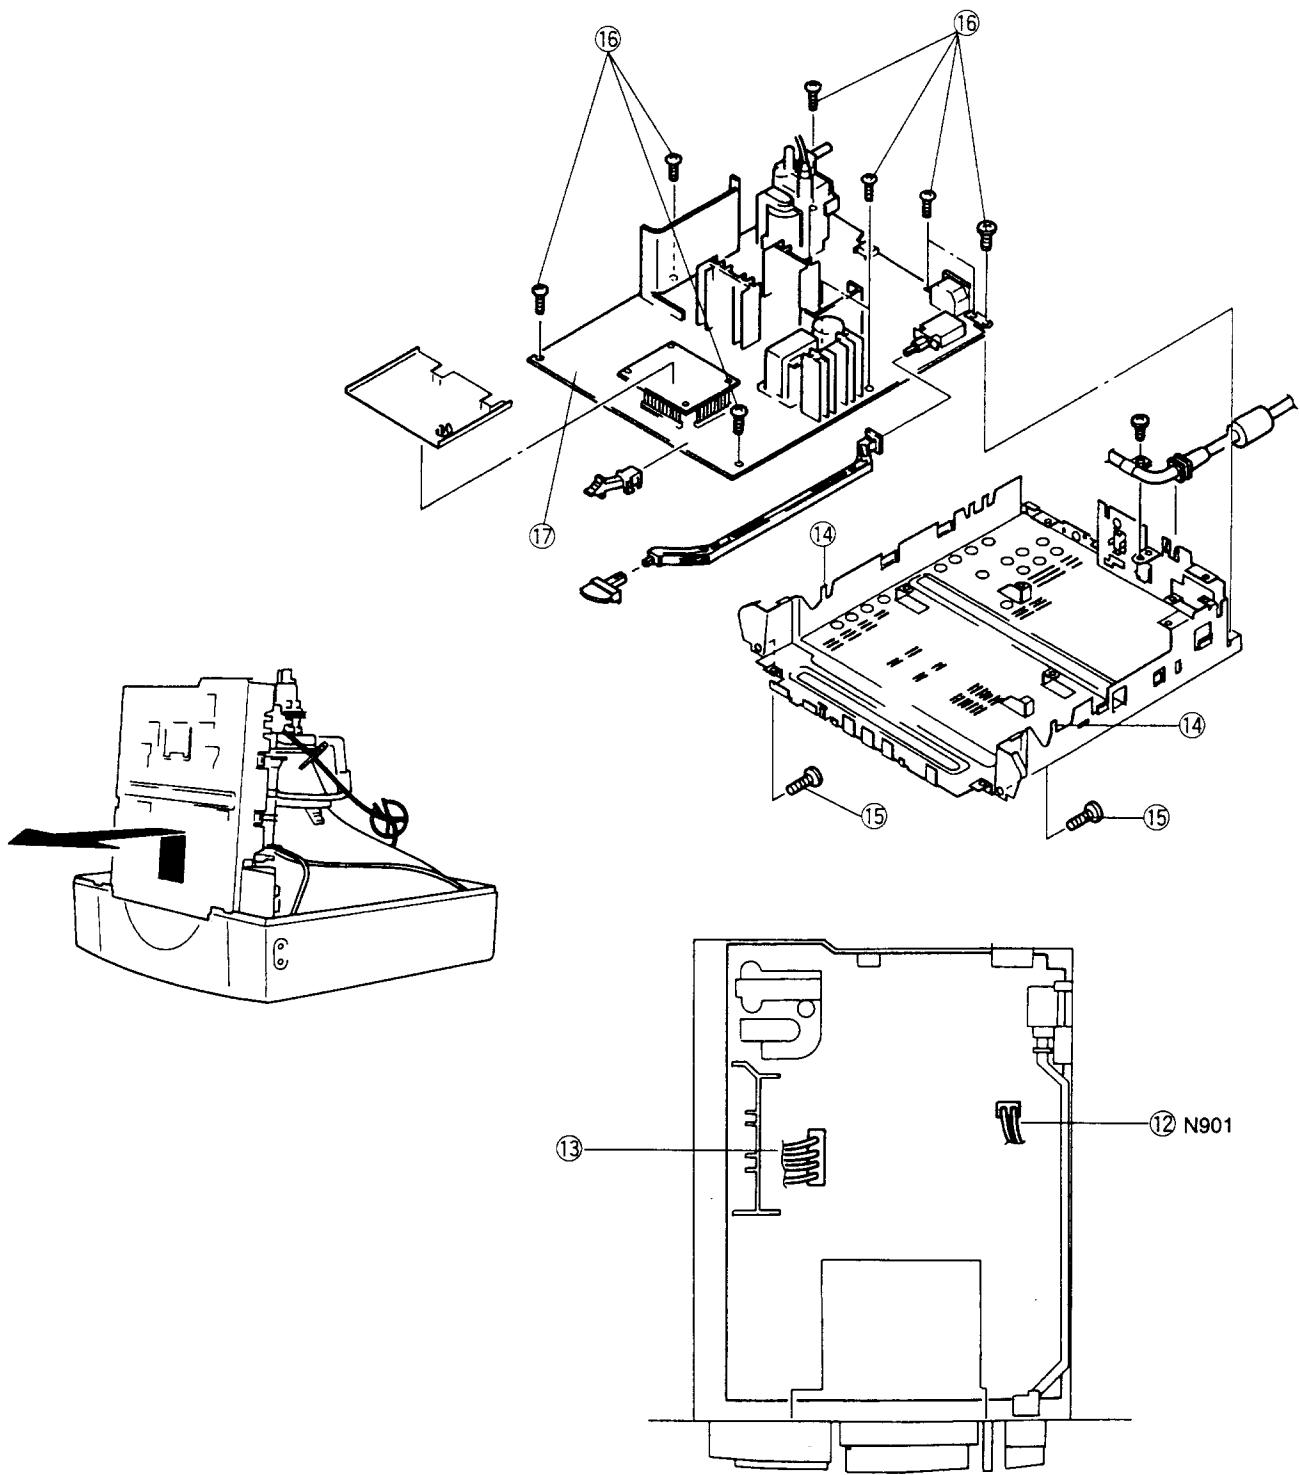

- 3) Loosen the screw ⑤ securing the CRT neck and the shield case.
- 4) Remove the PCB block from the CRT.
- 5) Remove the N1006 connector ⑥.
- 6) Remove two focus leads ⑦ after pulling up the focus lead securing-lever.
- 7) Remove ground connector ⑧ (N1005) connected to the PCB.
- 8) Remove N1001 connector ⑨.
- 9) Remove N1003A connector ⑩.
- 10) Remove N1002A connector ⑪.
- 11) Remove the PCB from the shield case.

3. Main PCB Removal

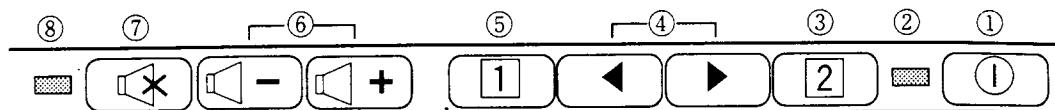

- 1) Remove the connector ⑫ (N901) of the degauss coil.
- 2) Remove the DY connector ⑬.
- 3) Remove the anode cap.
- 4) Remove two ground connector ⑭.
- 5) Move the CRT face down and remove two screws ⑮ securing the bottom fitting metal.
- 6) Remove the fitting metal and the PCB from the cabinet.
- 7) Remove ten screws ⑯ securing the fitting metal and PCB.
- 8) Remove the PCB ⑯ with the figure referenced.

CONTROL LOCATION

Basic operation of parts

Control panel

- | | |
|----------------|--|
| ① Power switch | To switch on and off the monitor. |
| ② Pilot LED | Light up green when power is ON ; turns yellow in power management mode. |
| ③ OSD 2 key | Selected or switch change data. |
| ④ OSD ▲ ▼ key | (1) To display contrast menu ; to adjust contrast
(2) To adjust level of selected item. |
| ⑤ OSD 1 key | To display main menu ; quit menu. Store change data in the memory. |
| ⑥ Volume key | Adjusts the sound volume for the built-in speakers and the headphone terminals. |
| ⑦ Mute key | Turns the built-in speakers and the headphone terminals sound ON and OFF. |
| ⑧ Mute LED | Indicates that the built-in speakers are in mute operation. |

Examples of on-screen operation

A. Contrast adjustment

Display changes

Steps of operation

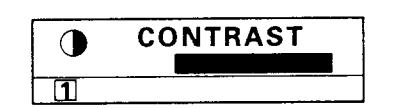

1. Display the contrast adjustment menu using the ▲ key or ▼ key.

2. Set the desired state using the ▲ key or ▼ key. If the [1] key is pressed, the set data is stored in the memory and the menu screen is cleared.

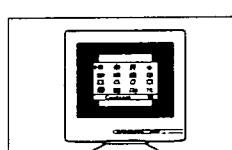

On-screen display changes

< Contrast menu >

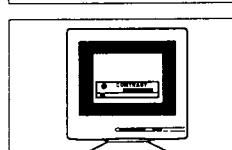

B. H. size adjustment

Display changes

Steps of operation

1. Call the main menu on the screen by pressing the [1] key.

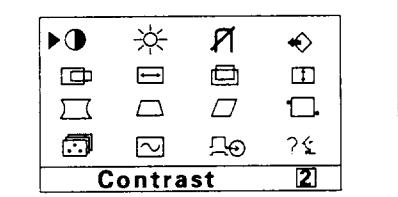

2. Move to cursor to H. SIZE using the ▲ key or ▼ key, then press the [2] key to select.

3. Set the desired state using the ▲ key or ▼ key. If the [1](EXIT) key is pressed, the set data is stored in the memory and the menu screen is cleared.

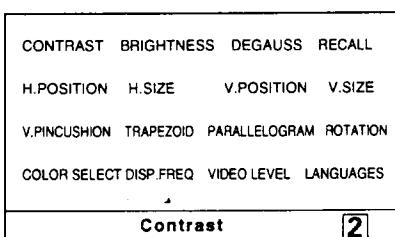

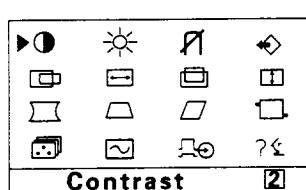

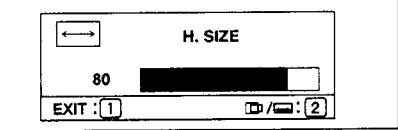

On-screen display changes

< Menu >

Main menu

< Sub menu >

CAUTION FOR ADJUSTMENT AND REPAIR

1. Degaussing is inevitably required at purity adjustment or convergence adjustment.
2. If you check or adjust electrical specification or function, more than 20 minutes burn-in is required.
3. Reforming of the lead wire is required after your repair work.
4. Prior to starting work, be sure to check that the input signal is at the specified timing and that the polarity is as specified in all modes.
5. Brightness control: After mounting the rear cover, brightness tends to decrease about 5 cd/m² on a flat white field and about 1 cm/m² on a white raster field. This should be taken into consideration.
6. Brightness stabilizing time: It takes about 20 to 50 seconds for the brightness to stabilize after turning the power off for 5 seconds (AC). Therefore, care should be taken to this.
7. Aging should be made in white raster of 30 ~ 50 cd/m² and raster size, 320 x 240 mm before adjusting the ITC.
8. Set the CONTRAST to MAX and BRIGHTNESS to CENTER using the O.S.D.

CAUTION FOR SERVICING

When servicing or replacing the CRT, high voltage sometimes remains on the anode. So, completely discharge high voltage before servicing or replacing the CRT so as to prevent a shock to the service person.

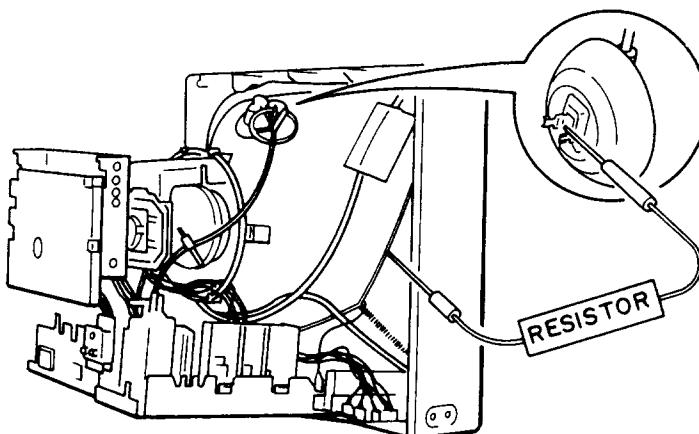

CRT Anode Discharge

1. When you check the CRT anode or replace the CRT, discharge the CRT anode to the external conductive coating (aquadag) of CRT, especially when checked right after power turn-off.
2. Ground one end of a jumper wire which has a resistor (30 kV < resisting pressure 100 MΩ) and connect the other point to the CRT anode.

Note: Grounding must be done first.

This model has a section that does not share a common ground with the power supply section. The different sections are referred to as the HOT section and the COLD section in the precautions below.

1. Do not touch the HOT section and the COLD section at the same time. You may be hit by an electric shock.
2. Do not short the HOT section to the COLD section. This could blow the fuse or damage parts.
3. Never measure the HOT section and the COLD section at the same time when using tools such as oscilloscopes or multimeters.
4. Always unplug the unit before beginning any operation such as removing the chassis.

ADJUSTMENT AND CHECK PROCEDURE

INTRODUCTION

- This monitor is controlled by a microcomputer. With the exception of purity/convergence/focus all is digitally adjusted.

Therefore a computer, the dedicated control software, the dedicated interface, a 9~12 V power supply, and a signal generator are required servicing.

TOOLS REQUIRED

• Computer

The control software is IBM PC compatible only. Therefore, it is not compatible with any other operating systems. For further information please contact our sales office.

• Control Software

The HV7 chassis can only use "TXD1734 adjustment program disk". No other program can access the EEPROM on the monitor. For further information please contact our sales office.

(This program is common in TX-D1734 and TX-D1734F)

• Interface

The interface is dedicated to work only with the control software and the our chassis. There are no substitutes for this interface. For further information please contact our sales office.

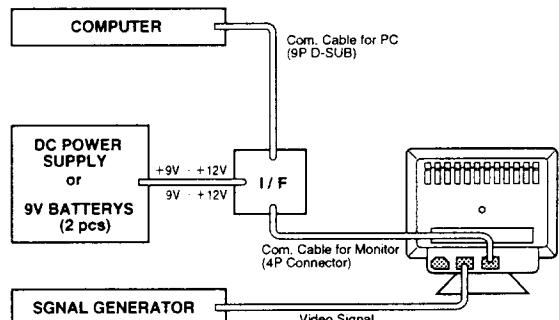

• Power Supply

A DC 9~12 V (+9~12 V/-9~12 V) power supply is required for operating the interface.

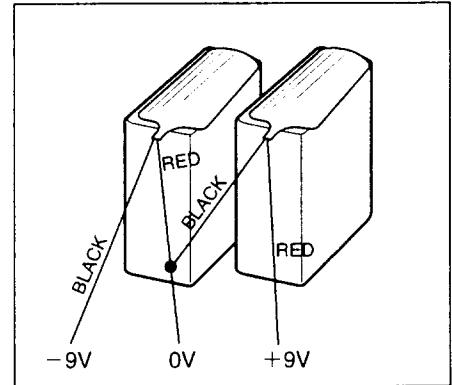

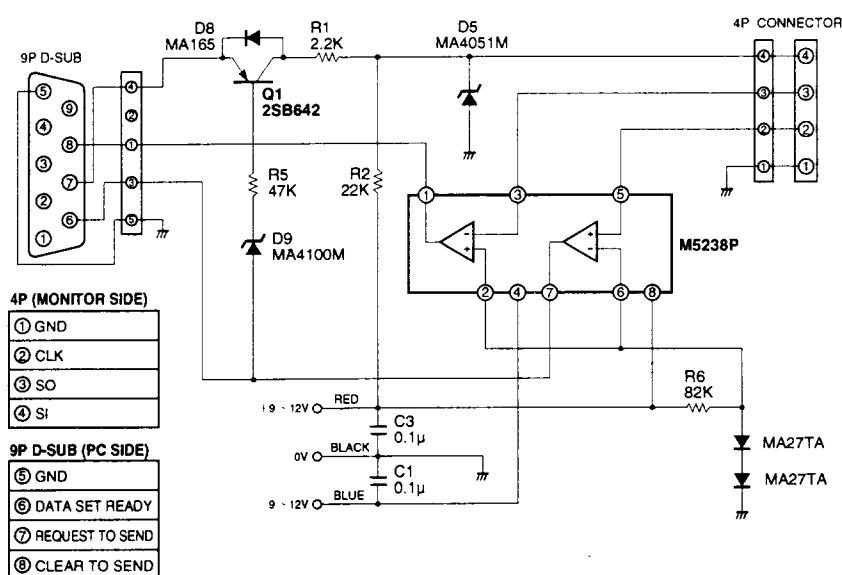

• Signal Generator

It is necessary for you to use a signal generator which operates on fH 82 kHz, fv 160 Hz, and fc 135 MHz bands.

INTERFACE CONNECTION

INTERFACE SCHEMATIC DIAGRAM

BATTERY CONNECTION

OTHER TOOLS

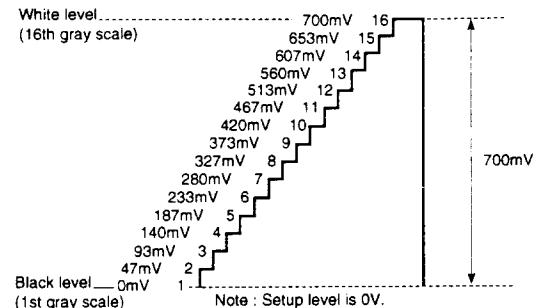

- Oscilloscope (dual trace)
- Scope probe – Attenuation: 100:1
Attenuation: 10:1
- Digital Voltmeter – Range: 0 to 1000 V DC
Accuracy: 0.1 %
- TV color Analyzer II – that reads luminance and chromaticity X and Y coordinates.
- Digital High Voltmeter
- AC power supply – Output voltage : 0 to 300 V
- Degaussing coil
- Convergence meter
- Scale
- Double-faced scale
- Microscope – Scale factor: 50
- White lacquer (Paint)

STANDARD CONDITION OF ADJUSTMENT

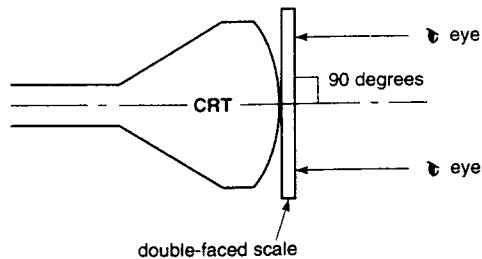

PROCEDURE

- Signal timing : Standard timing 1024 x 768 (See page 5)
- Display pattern : White, full "H" character
- Signal level : V/H: TTL level video: 700 mV
- Input source : AC 120 V, 60 Hz
- Ambient temperature : Room temperature
- Warm-up time : More than 30 minutes
- Brightness control : Center
- Contrast control : Max.
- Magnetic field : Vertical: 40 μ T
Horizontal: 0 μ T
- Signal cable : Attached

Video input signal from PC.

- Use a Helmholtz device to adjust an unit with no horizontal magnetic field and a vertical field of 40 μ T. Inspect the unit under the same conditions.
- The ambient illuminance must be 200 lux.
- Use an external degaussing coil any time the DEGAUSS switch does not remove color shading.
- To check the image width, height, linearity and distortion, proceed as below.

Measure level with respect to tube axis.

ADJUSTMENT SOFTWARE

1. Software operating procedure

- A) Power on the computer.
- B) Connect the Communication cable for monitor adjustment.
- C) Insert the adjustment disk into the drive.
- D) At the A:> prompt type "VSR" then press [ENTER].

A function to identify the connected monitor is provided to prevent accidents due to erroneous use of the HV7 chassis program. If this program is used for any monitor other than the HV7, the message reading "This monitor is not an HV7 chassis. All further activity has been prevented" is displayed and the operation is stopped.

- E) Refer to the adjustment procedures.

2. Adjustment Program

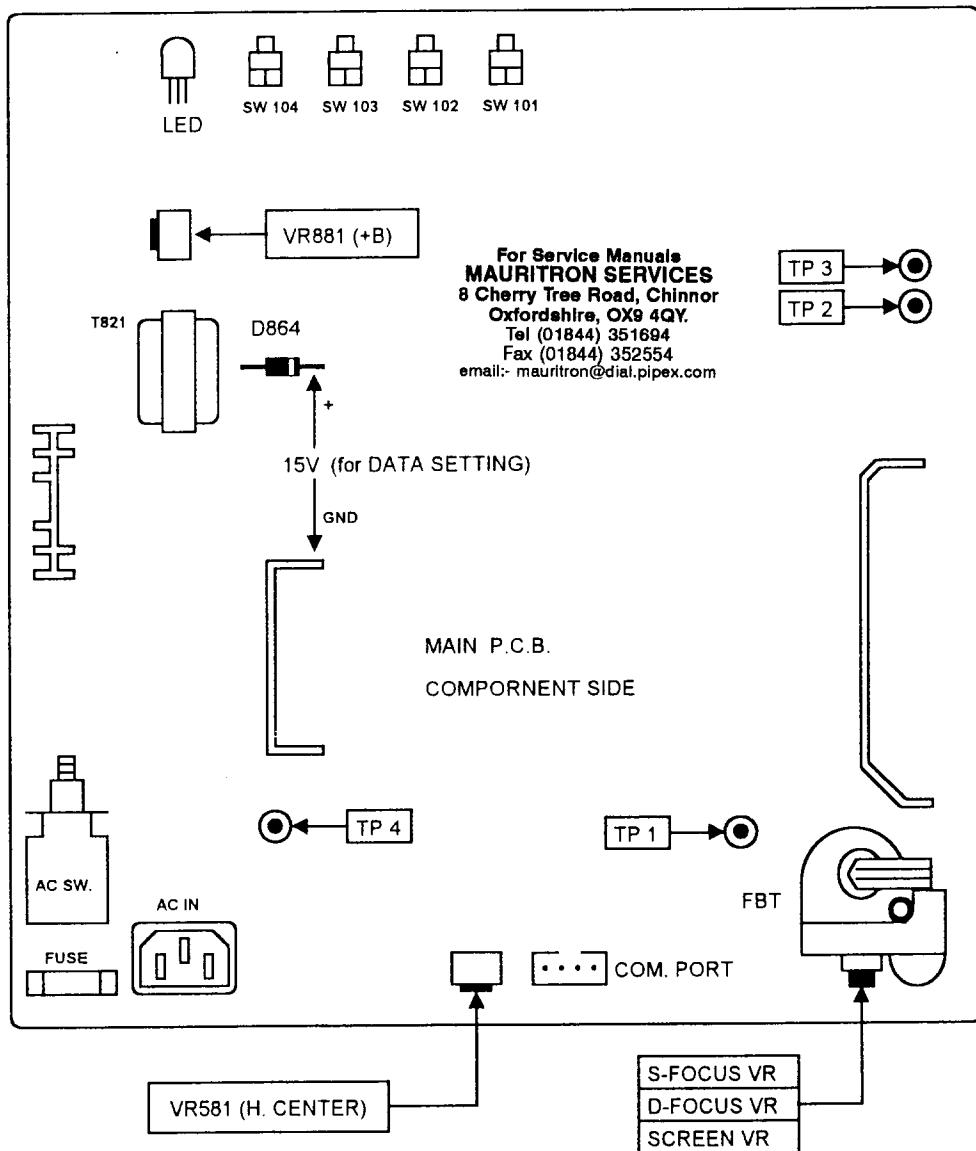

Main Menu of Adjustment Program

- | | | | | | | | | |
|---|-----------------------|----|----------------------|--|--|--|--|--|
| <<HV7 ADJUSTMENT PROGRAM MENU>> (e: exit, q: quit) <Ver **> | | | | | | | | |
| 1) | Load data from FILE | 6) | Save data to FILE | | | | | |
| 2) | Adjust VSR setting | 7) | Special ADJUST | | | | | |
| 3) | Adjust STD setting | 8) | Information Service | | | | | |
| 4) | Adjust Factory preset | 9) | Show Version & Error | | | | | |
| 5) | Clear User preset | | | | | | | |

Description of Function of Each Menu

- 1) Load Data from File
This transfers the data file from the disk to the EEPROM on the monitor.
- 2) Adjust VSR Setting
To guarantee that the full range of horizontal frequencies operate correctly. The reference voltage and the distortion offset data should be set.
- 3) Adjust STD Setting
This is used to control the size and color position for standard timing.
- 4) Adjust Factory Preset
Makes adjustments to the factory presets. This data is also referenced when in modes other than the preset mode.
- 5) Clear User Preset
Clear the data written in the user preset domain. There is no data in the user presets when the product shipped from the factory.
- 6) Save Data to File
Transfers the data from the EEPROM on the monitor to a data file on a floppy disk or hard drive. The data file can be named anything as long as it is less than 8 characters long.
- 7) Special Adjust
This menu has the following functions
 - ① Color and brightness adjustment
 - ② Related data is automatically set on the basis of adjustment results to save the time for adjustment.
(Example: Color adjustment applies only to the 9300 K, while 6550 K and user color data are automatically set.)
 - ③ To prevent operation errors in changes of various type of control flags, these flags are automatically returned to the default settings (Final Tune).
- 8) Information Service
Displays the H/V frequencies that is being supplied to the monitor and gives the operational status of the monitor.
- 9) Show Version and Error
Shows the version of the microprocessor that is in the monitor. Also, if there is an error in the operation of the monitor.
The error is displayed on the screen of the PC.

Select 1: <u>9300K COLOR Adjust</u> from the menu. Make the adjustment <u>R,G and B Low Light</u> by using \leftarrow , \rightarrow and Screen VR to CRT cut-off. Please refer to flow chart for this adjustment on page 28.	
7) Special ADJUST 1: 9300K COLOR Adjust	□ White window (5cm×5cm at center)	J15 J16 J17 J18		Change to the pattern at left. Move the cell to the following items and make the adjustment to the value shown at right by using \square and \rightarrow . <u>R. SUB CONT 9300K</u> <u>G. SUB CONT 9300K</u> <u>B. SUB CONT 9300K</u> Set Contrast to MIN using the OSD. Move the cell to the following items and make the adjustment to the value shown at right by using \square and \rightarrow . <u>R. LOW LIGHT 9300K</u> <u>G. LOW LIGHT 9300K</u> <u>B. LOW LIGHT 9300K</u> Adjust two colors only out of above three as shown in J13 on page 28.	$Y=130\text{ cd/m}^2$ $x=0.283 \pm 0.20$ $y=0.298 \pm 0.20$ $x=0.283 \pm 0.20$ $y=0.298 \pm 0.20$
J	ABL	□ White flat field (full window)	J19 J20 J21	Change to the pattern at left. Move the cell to <u>ABL</u> and make the adjustment to the value shown at right by using \square and \rightarrow . Press \square to return to menu of J4.	$Y=113\text{ cd/m}^2$
1.0V ADJUST	□ White window (5cm×5cm at center) 1.0V p-p video*	J22 J23 J24 J25 J26 J27 J28 JE		Change to the pattern at left.* Set the cell to the menu at left and press \square . Select the <u>4:VIDEO 1.0Vpp ADJUST</u> from the menu. Set Input Video Level 1.0V using the OSD of the monitor. Make the adjustment to the value shown at right by using \square and \rightarrow . Press \square to return to menu of J24. Select the <u>7: BRIGHTNESS LIMIT SETTING</u> from the menu. Press \square to return to menu of J28 and Press \square to return to the main menu.	$Y=130\text{ cd/m}^2$
DATA SETTING					

Should make Final Tune after this adjustment refer to item L on page 29.

WARNING
Do not turn the screen VR after
this adjustment.

CRT CUT-OFF ADJUSTMENT

Signal : Turn off the R, G, B (sync signal only)

Adjust Menu : 7) Special Adjust ▶ To Sub Menu
1: 9300K COLOR Adjust

Set Screen VR fully counterclockwise (Min).

J 5 Set Screen VR fully counterclockwise (Min).

J 6 Set data value to "95" for R, G, B Low Light

J 7 Set data value to "80" for BRIGHTNESS

J 8 Turn screen VR until the raster appears with any one of three (R, G, B) colors

If Red appears in J 8

J 9 Set Value to "00" for
< R. Low Light 9300K >

J 9 Set Value to "00" for
< G. Low Light 9300K >

J 9 Set Value to "00" for
< B. Low Light 9300K >

If Green appears in J 8

J 10 Set Value to "00" for
< R. Low Light 9300K >

J 10 Set Value to "00" for
< G. Low Light 9300K >

J 10 Set Value to "00" for
< B. Low Light 9300K >

If Blue appears in J 8

J 10 Set Value to "00" for
< B. Low Light 9300K >

J 10 Set Value to "00" for
< R or G colors.

J 11 Set Value to "00" for
< R. Low Light 9300K >

J 11 Set Value to "00" for
< B. Low Light 9300K >

TECHNICAL INFORMATION FOR DDC

- It must be noted that this monitor is designed to be applicable to DDC1 communication the following points are different from ordinary monitors.

- Use the signal cable, the which is furnished as an accessory (applicable to DDC1) only.
- When replacing a PCB on which ROM for DDC1 is mounted, data writing is required.
In addition to the above, a computer applicable to WINDOWS and a 5V power supply unit are required.

- DDC1 Data Read/write System

- Communication jig
 - The composition of Communication jig
 - Interface PCB.
 - Adapter cable (D-SUB 25P → 9P)
 - 15P D-SUB cable
 - Connection diagram for communication jig.

- Procedure to turn on the power:

- Make connections as shown above.
- Turn on the computer.
- Turn on the power supply of communication jig.
- Turn on the power supply of the MONITOR.

(Note) If the above-mentioned operation is normal, LED of the communication jig turns green after step (4).

If this LED is red, repeat the steps (3) and (4).

- Confirmation of DDC mode

LED is mounted on the communication jig. According to its color, the DDC mode can be discriminated.

- | | |
|------------------------|---------------------|
| - When LED is green. | DDC1 mode. |
| - When LED is orange. | DDC2B mode. |
| - When LED is red. | Transmission error. |
| - When LED is not lit. | Obsolete. |

- Preliminary arrangements for using DDC data read/write software

- Copy DDC WRITE. EXE from floppy disk to hard disk drive (Name: \PanaTool Directory).

- Register DDC data read/write software (DDCWRITE.EXE) in the Icon.

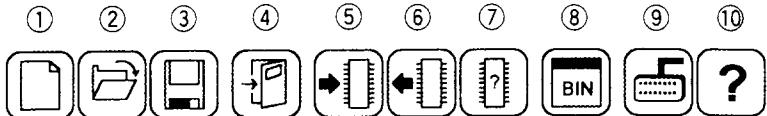

- Click the menu bar "Icon" of the program manager.
- Select "register and group create" from the pull down menu.
- Select "group create."
- Name the group PanaTool and register the group.
- Repeat (1) and (2) again and select "Icon registration."
- Enter "DDC1/2B" for [Title] and "Hard disk drive name: \PanaTool\DDCWRITE. EXE" for [Command line]. Then select [OK]

- How to use DDC data read/write software.

- Start of DDC data read/write software.
Double-click the "DDC1/2B" Icon in the PanaTool group.

- Meaning of a button displayed.
The tool bar indicates the nine icons shown below.

These icons are explained, from left to right :

- Icon ① : Initialization of screen display contents.
 - Icon ② : File is opened and displayed on the screen.
 - Icon ③ : Data are stored in a file.
 - Icon ④ : Finish the DDC data read/write software.
 - Icon ⑤ : Data displayed on the screen are written in EEPROM.
 - Icon ⑥ : Contents of EEPROM are displayed on the screen.
 - Icon ⑦ : Contents of EEPROM are compared with the data displayed on the screen.
 - Icon ⑧ : Check binary data by text format.
 - Icon ⑨ : Communication port setting.
Contents of setting : PORT → Using Communication port No.
Baud rate → 9600, Data → 8 bits, Parity → Nil, Stop → 1 bits
 - Icon ⑩ : Version information display.

- (3) Using the tool bar explained in (2) above, write data in EEPROM and make operations of reading, etc. A pop-up window may be displayed on the way. In such a case, select a proper one according to the message.

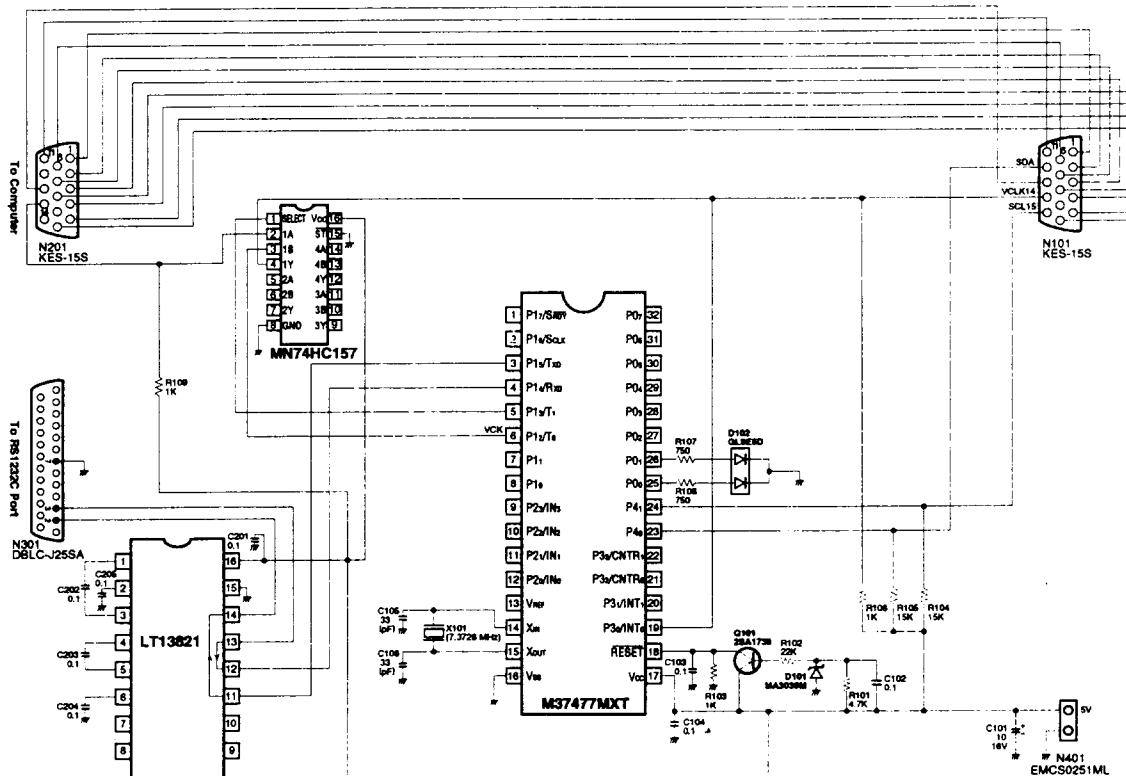

(Example 1) EEPROM data are displayed on the screen.

- ① Click the icon (6th from the left) in the tool bar, with the arrow pointing from the memory chip.
 - ② Decide whether reading is started in DDC1 mode or DDC2B mode.
 - ③ Select START.

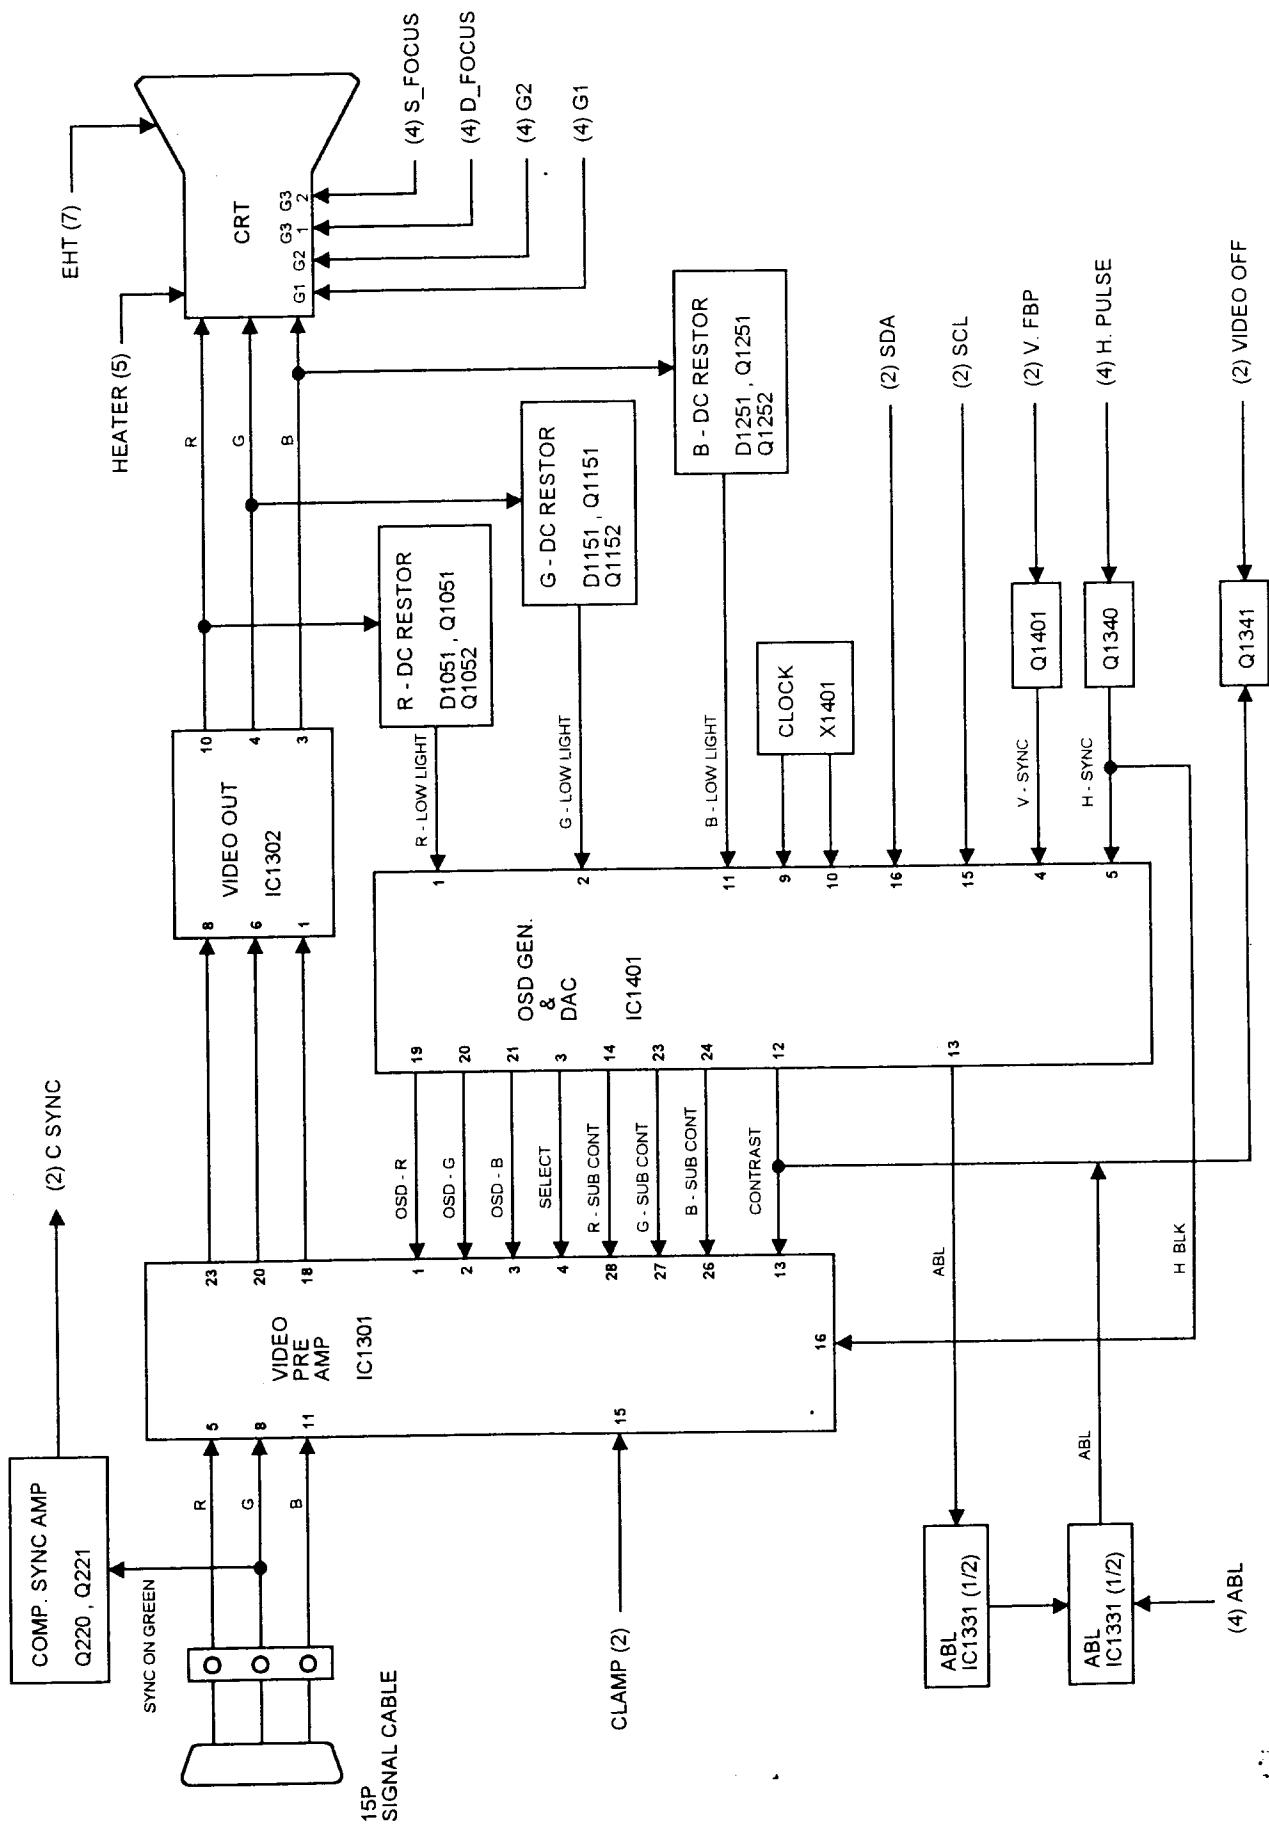

(Example 2) Data displayed on the screen are written in EEPROM.

- ① Click the icon (5th from the left) in the tool bar, with the arrow pointing toward in the memory chip.
 - ② Select START.

SCHEMATIC DIAGRAM

IMPORTANT SAFETY NOTICE

The component identified by shading or international symbol Δ on the following schematic diagrams incorporate special features important for protection from X-Radiation, fire and electrical shock hazards. When servicing it is essential that only manufacturer's specified parts be used for those critical components.

NOTES :

1. RESISTOR

All resistors are carbon 1/4W resistor, unless otherwise noted by the following marks.

Unit of resistance is ohm (Ω), (K = 1,000, M = 1,000,000)

<input type="radio"/>	Non Flammable	Δ	Solid
<input checked="" type="checkbox"/>	Metal Oxide	\odot	Metal (Precision and high stability)
<input type="checkbox"/>	Wire Wound	\blacksquare	Thermistor
<input checked="" type="checkbox"/>	Fusible	$\blacksquare\odot$	Positive coefficient Thermistor
<input checked="" type="checkbox"/>	Flame Proof Rectangular		

2. CAPACITOR

All capacitors are ceramic 50V capacitor, unless otherwise noted by the following marks.

Unit of capacitance is μF , unless otherwise noted.

$\frac{+}{-}$	Electrolytic	\textcircled{M}	Polyester
(T)	Tantalum	\textcircled{m}	Metalized Polyester
(NP)	Bipolar	$\textcircled{\times}$	Polypropylene
(S)	Polystyrene	\triangle	Mica
$\textcircled{\times}$	Temperature Compensation	$\textcircled{\circ}$	Ceramic
		\odot	Ceramic (SL)

3. COIL

Unit of inductance is μH , unless otherwise noted.

4. VOLTAGE MEASUREMENT

Voltage is measured by a digital meter receiving normal signal.

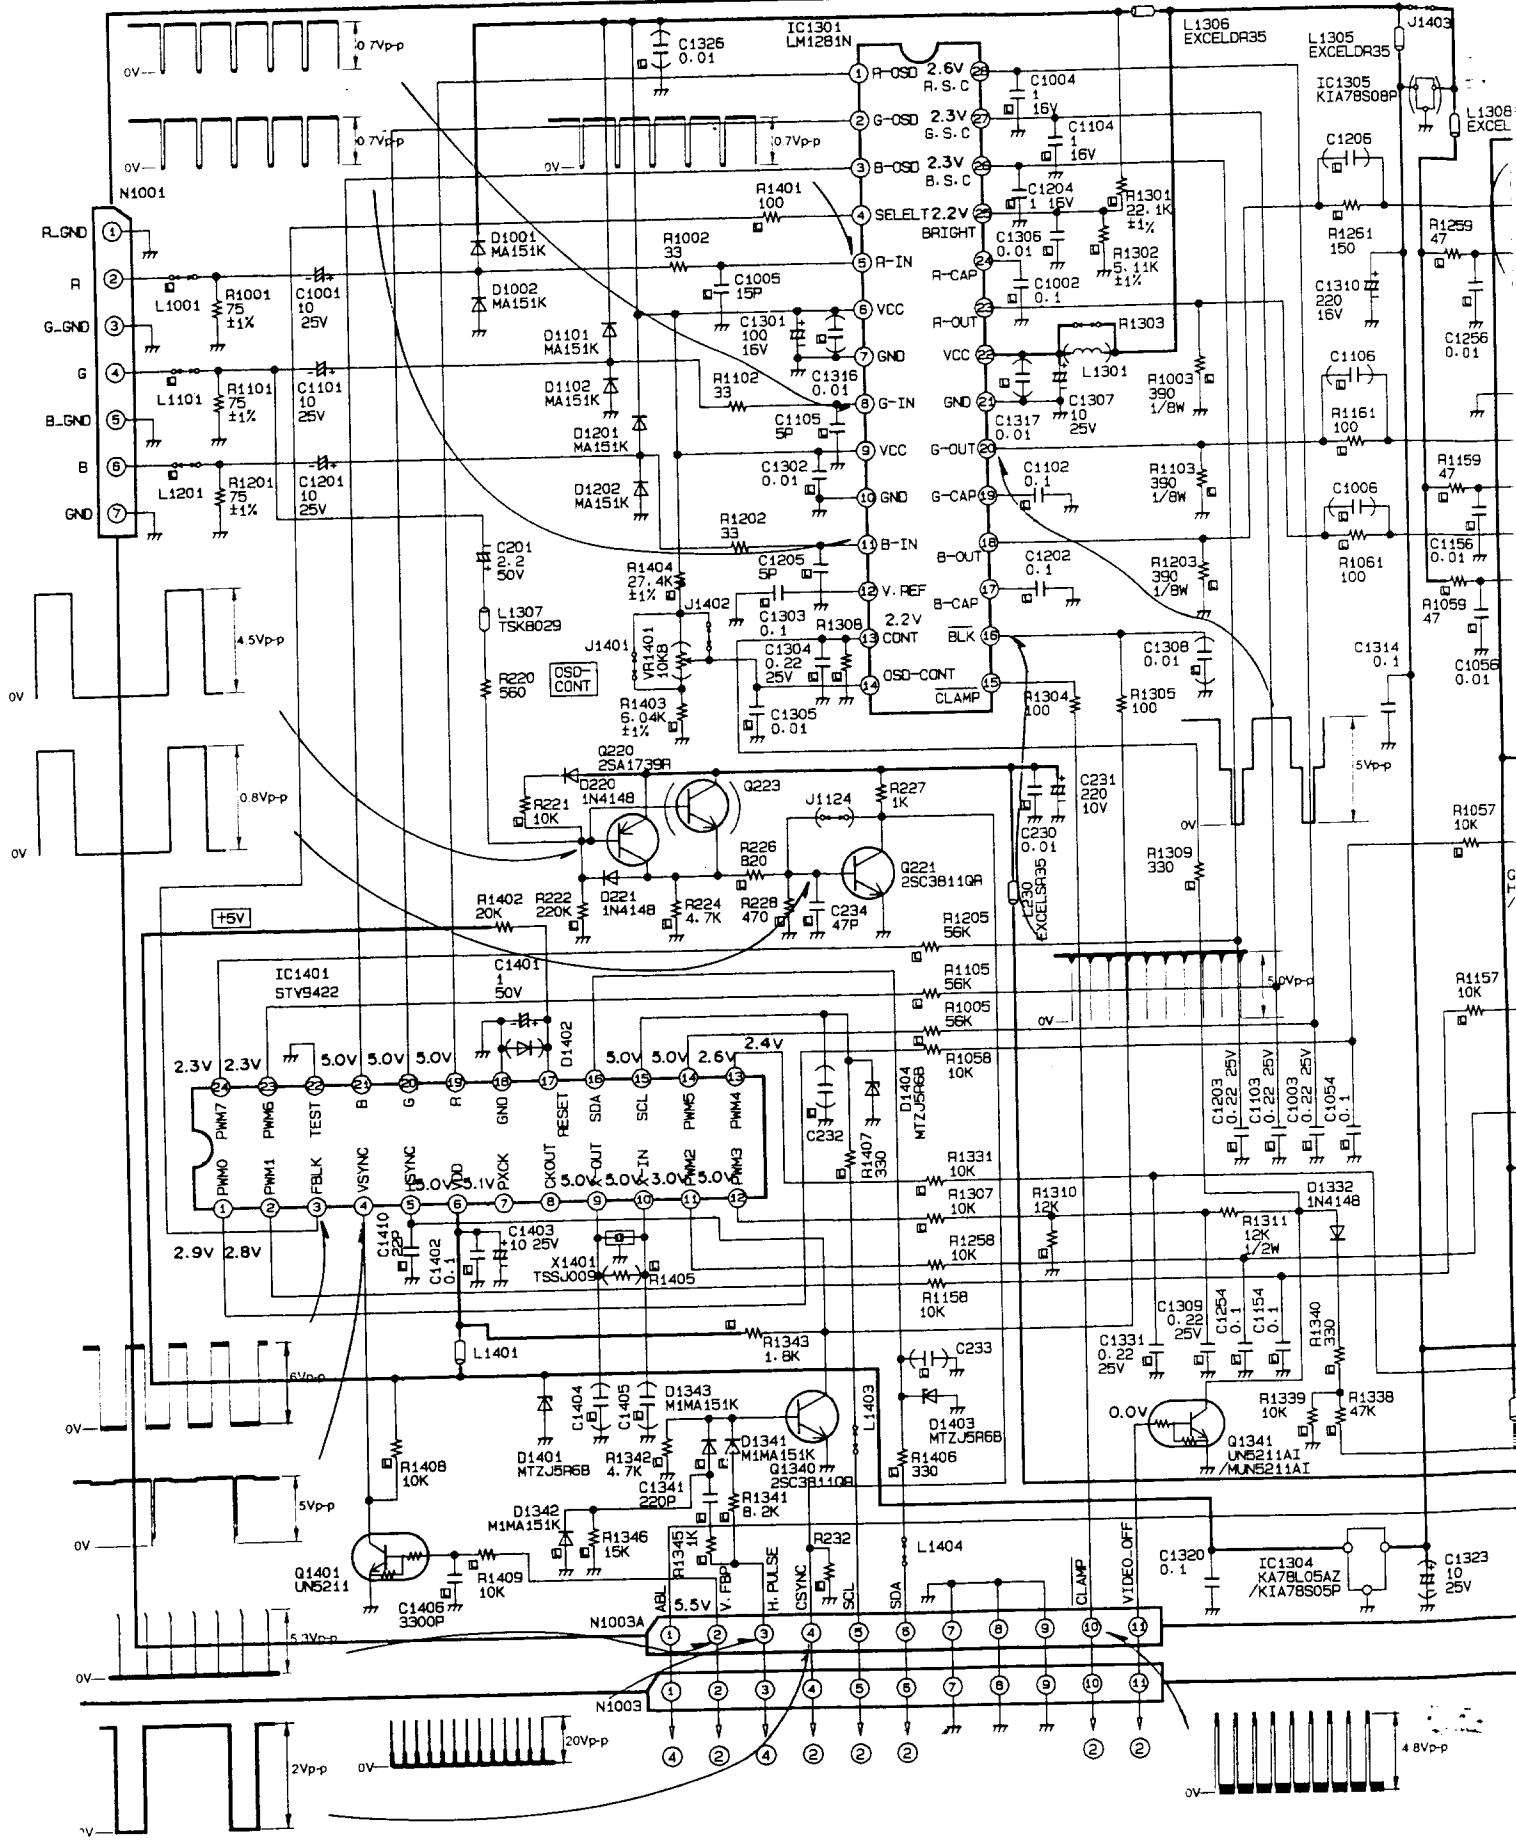

5. This schematic diagram is the latest at the time of printing and is subject to change without notice.

SERVICE NOTES :

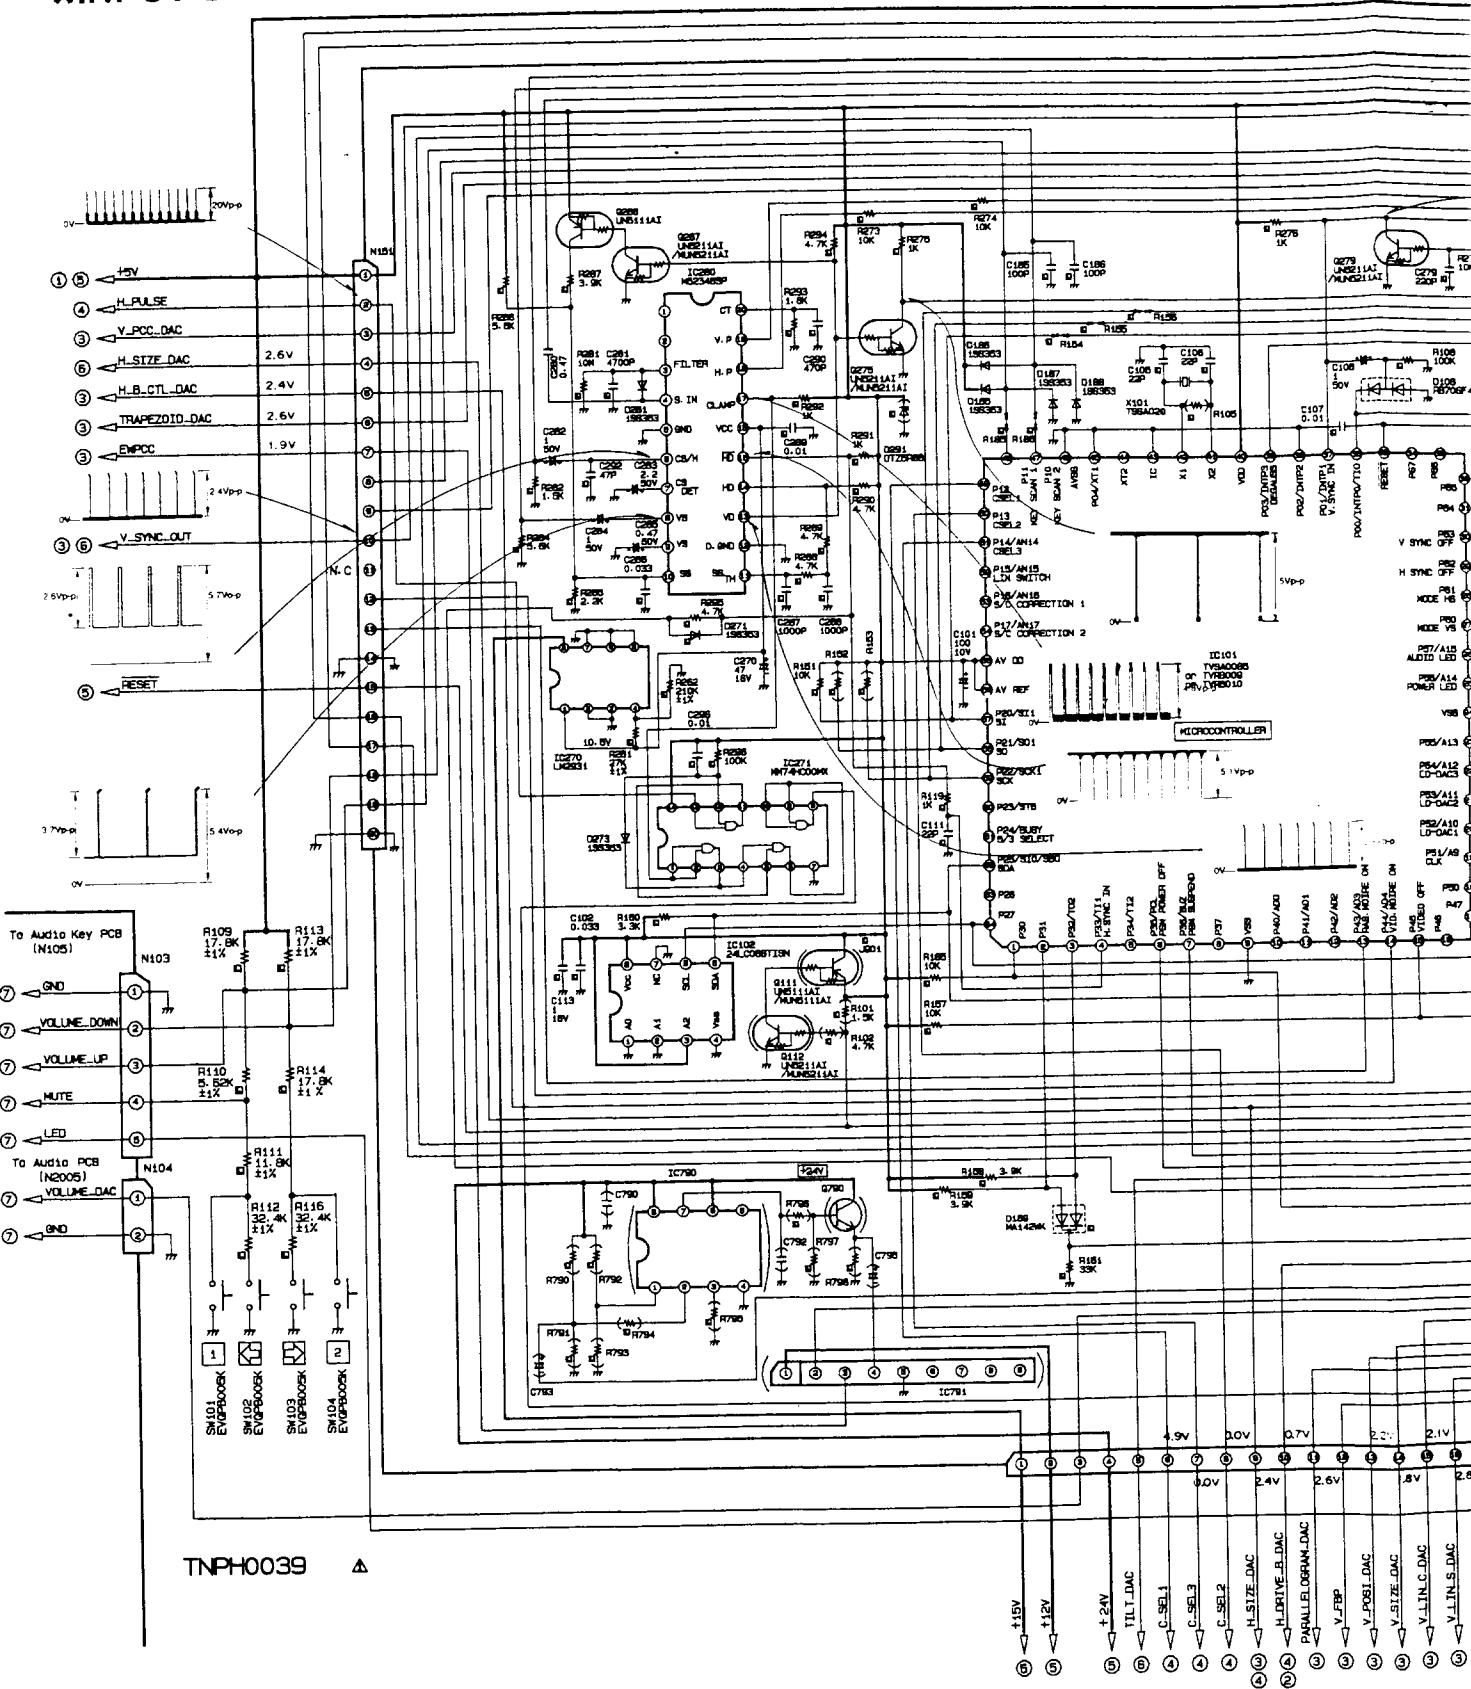

This model has a section that does not share a common ground with the power supply section. The different sections are referred to as the HOT section and the COLD section in the precautions below.

1. Do not touch the HOT section and the COLD section at the same time. You may receive an electric shock.
2. Do not short the HOT section to the COLD section. This could blow the fuse or damage parts.
3. Never measure the HOT section and the COLD section at the same time when using tools such as oscilloscopes or multimeters.
4. Always unplug the unit before beginning any operation such as removing the chassis.
